RE: Assabet River Rail Trail, Acton/Maynard
MassDOT Project #604531
25% Submittal

Dear Mr. Rezendes,

Upon our review of the above mentioned contract site plans we have found no natural gas facilities currently exist in this project scope. At this time National Grid has no planned work for gas facilities located within the scope of this project.

If any changes are made extending beyond the current project limits I would request that you please forward a copy of the plans to National Grid for review.

Please feel free to contact me at 781-907-2845 should any further review or assistance be needed.

Best wishes,

A handwritten signature in cursive script that reads "Melissa F. Owens".

Melissa F. Owens
